REULAND

DECEMBER 2014

Volume 1, Issue 4

One of the real joys of the Holiday Season is the opportunity to say Thank You and to wish you the very best for the New Year

Meet Our Team

2014 has proven to be a very good year for the foundry division. We have welcomed new customers and have increased our market share at several of our loyal existing accounts.

Now it's time to introduce the people who make the magic happen!

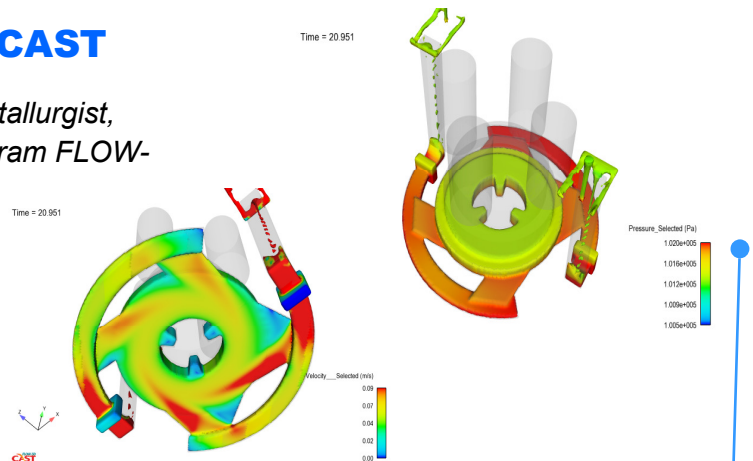

Daniel Menchaca, senior lead heads up the team. Daniel has been at Reuland for 38 years, starting out in the cleaning room back in 1976.

Next, we have Osiel Saldana, foundry lead who assists Daniel on the production floor. Osiel just celebrated 30 years at Reuland.

Reuland is a family affair, notably with our in house pattern maker, Secondino Saldana (Osiel's brother) has been building and maintaining our tooling for 43 years. There are very few "short timers" at Reuland. Company wide, the average length of employment is 15 years. So, to all 31 men who work in the foundry division, I salute you and thank you for all you do. We've had a banner year in 2014 and the future holds even more success. 2015....bring it on, we are ready!!

NEW PRODUCT: FLOW-3D CAST

The holidays came early for Reuland's chief metallurgist, John Pieti. We have acquired the software program FLOW-3D CAST. This computer modeling program simulates a wide range of casting processes. Simulations of filling and solidification of castings in the mold will enhance our designs prior to production. This is a great feature we can now add to the services we offer our customers.
